INVENTORY AND SHELF REPLENISHMENT IN NEW WAREHOUSE

Case Study: Industrial – Health Food Company

A health food company required the support of RGIS to complete a **warehouse inventory and shelf replenishment** of a new warehouse

RGIS

INVENTORY AND SHELF REPLENISHMENT IN NEW WAREHOUSE

Case Study: Industrial – Health Food Company

An Italian company that produces, selects and sells nuts and dried fruit has a production plant with over 65,000 square meters and 32 production lines. The customer purchased a new warehouse and wanted support in remodelling, stocking shelves and counting the stock that was going into the warehouse.

REQUIREMENT

The health food company partnered with RGIS to **remodel, stock and count** the inventory within the new warehouse. The customer required RGIS to complete the following:

- Complete a full **wall-to-wall count** of all stock within the new warehouse
- Remodel the warehouse
- **Replenish all shelves** within the warehouse
- All tasks to be completed within the time frame of **five days**

SOLUTION

RGIS worked with the health food company to complete a remodel, stock shelves and count of all stock within the new warehouse.

- A team of three experienced auditors were scheduled in for five days
- **Remodel** was completed within the first three days
- The last two days were allocated to **stock shelves and count stock**

RESULTS

The health food company found partnering with RGIS meant the time, effort and cost of completing these activities in-house had been eliminated.

- RGIS was able to complete the task within the specified five days
- The data was in a format requested by the customer
- The health food company **saved two weeks** of time by outsourcing the activities to RGIS and **saved internal costs of €6,000**
- The customer did not need to rent additional equipment to complete the inventories
- The health food company now had a full understanding of what stock was in the new warehouse

By partnering with RGIS, the health food company **saved two weeks of time, saved internal costs of €6,000** and gained **accurate data** of the stock in the new warehouse
